

## 780,000

individuals in the US receive dialysis or have a kidney transplant  
*(only 11% of dialysis patients dialyze at home with PD)*

PD population is expected to increase

The **DPM-PD** is a web-based report of up-to-date trends in clinical care of US HD and PD patients

Reports include clinical practice, and PD prescription data with >150 charts, figures, and data tables

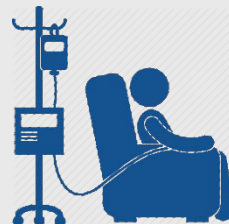

The **DPM-PD** data are updated every 6 months to reflect the most recent changes to clinical PD practices due to payment or policy updates, availability of new products, or other reasons
